

# THEO Technologies

## Full-Stack Developer

*Leuven, Belgium (Europe)*

*Full-time*

### How you'll make a difference

As a **Full-Stack Developer** at THEO Technologies, you help develop our software portal. Imagine Google Cloud Console or Amazon AWS Management Console, but for THEO Technologies products.

One day you are adding new user flows to our React-based frontend. Another, you are working on the backend integrating with our products' CI/CD pipelines or the product analytics engine.

You become part of a cross-functional Scrum team where everyone has one thing in common: we are passionate about making things easier for our users.

### Duties & Responsibilities

- **React, TypeScript, Nodejs or GraphQL** have little secrets for you. You write clean code and help keep the codebase in top shape;
- **Design, architect and implement** new full stack products from start to finish;
- You and your team work together to go from high level user needs to a low-level specification, execution plan and implementation;
- You work in an **agile team**. This means you should feel comfortable with working in short sprints, pair programming, daily standups, test-driven development, ...

### Desired Skills & Experience

- Bachelors in informatics, Master's in computer science, ...
- Knowledge and experience in using **TypeScript, React, Nodejs & GraphQL** and the ecosystem surrounding these technologies for building both front- and backend applications;
- Experience in **common software engineering practices** like version management, git, unit testing, code documentation, CI/CD, ...
- Experience in **test driven development** and experience in setting up and using **automated software testing solutions**;
- You're a **team player** that knows when to work together and when to fly solo;
- Experience in setting up and using **cloud resources** is a plus;

- Experience in configuration and usage of **relational and nonrelational databases** can come in handy;
- Experience in user interface design, and implementation using modern web standards is useful if you want to specialize in frontend development;
- Experience and knowledge about implementing best practices for security concerns is a good skill to have;
- Tons of **energy, passion, humor** and **enthusiasm**;
- Loving the challenges and atmosphere of a **young and fast-growing company**.

## What we offer

- A versatile full-time job in the animated city Leuven;
- A **competitive salary** with plenty of extra benefits;
- The opportunity to work for an exciting start-up conquering the world;
- A place to learn and get in touch with the cutting edge of online video;
- The company itself is doing exceptionally well. For career-motivated people, there will be **upward mobility**;
- A **stimulating working environment**;
- Nice and passionate colleagues;
- **Flexible hours**;
- Regular and fun team activities.

## Does this sound interesting to you?
